Technology and Human Systems
Castle Rock, Colorado, United States

Summary

With over two years of experience as a Sales Associate at The Home Depot, my focus is on supporting customers in identifying needs, clarifying project requirements, and recommending tailored solutions. By applying problem-solving, product knowledge, and clear communication, I contribute to customer success in a high-volume retail environment. Certified by NCEES through the FE Exam, I bring technical communication skills and a commitment to continuous improvement to my role, ensuring efficient store operations and enhanced customer satisfaction. My goal is to provide practical solutions that empower customers to achieve their home improvement and project objectives.

Experience

The Home Depot

Sales Associate

April 2024 - Present (2 years 3 months)

Castle Rock, CO

Support customers in a high-volume retail environment by identifying needs, clarifying requirements, and recommending appropriate products, materials, and solutions. Apply problem-solving, product knowledge, and clear communication to help customers complete home improvement, maintenance, and project-related tasks.

Key Contributions:

Assist customers in defining project needs, comparing product options, and selecting appropriate solutions based on function, cost, availability, and application.

Translate customer requirements into practical product recommendations, including tools, materials, fixtures, and project supplies.

Support store operations by maintaining product availability, organizing merchandise, and contributing to efficient inventory and replenishment processes.

Use point-of-sale and inventory systems to check product availability, locate items, and support accurate customer transactions.

Communicate with customers, team members, and supervisors to resolve issues, answer technical product questions, and improve the customer experience.

Apply process discipline, attention to detail, and safety awareness in a fast-paced operational environment.

Strengthen transferable skills relevant to Industrial and Systems Engineering, including requirements clarification, workflow awareness, customer-facing problem solving, and operational coordination.

Thor3D

Sales Engineer

August 2018 - February 2022 (3 years 7 months)

Moscow

Supported engineering, manufacturing, and product development organizations in the evaluation and implementation of 3D scanning and reverse engineering solutions. Worked at the intersection of customer requirements, engineering workflows, and technical solution development to improve product design, inspection, and manufacturing processes.

Key Contributions:

Conducted requirements analysis to understand customer objectives, technical constraints, workflow challenges, and performance requirements.

Evaluated engineering and manufacturing processes to recommend appropriate 3D scanning, reverse engineering, and CAD-based solutions.

Analyzed customer workflows and identified opportunities to improve efficiency, accuracy, and data utilization throughout product development and inspection processes.

Developed CAD models, reverse-engineered components, and technical demonstrations using SolidWorks, Fusion 360, Geomagic Design X, Rhinoceros, and Blender.

Collaborated with engineering teams and stakeholders to translate customer needs into technical specifications and solution recommendations.

Performed technical evaluations and trade-off analysis to align solution capabilities with customer requirements, budgets, and operational constraints.

Presented technical concepts, workflows, and engineering solutions to customers, technical teams, and decision-makers.

Supported implementation planning, technical training, and adoption of digital engineering technologies across a variety of industries.

Built expertise in systems thinking by balancing technical requirements, operational considerations, stakeholder needs, and business objectives when developing solutions.

MultiMedia Communications Ltd

Dispatch Coordinator

December 2017 - July 2018 (8 months)

Christchurch

Coordinated the scheduling and deployment of crews for fiber laying projects to residential houses, ensuring timely completion and adherence to project timelines.

Managed communication with field technicians, subcontractors, and project managers to provide updates on project status and resolve any scheduling conflicts or issues.

Utilized scheduling software to create and maintain project schedules, assign tasks to crews, and track progress throughout each stage of the project.

Liaised with suppliers and vendors to ensure timely delivery of materials and equipment needed for fiber laying projects.

Monitored and tracked inventory levels of materials and equipment to prevent shortages and delays in project execution.

Implemented quality control measures to ensure that fiber laying activities met company standards and specifications.

Provided support to project managers by preparing reports, maintaining documentation, and assisting with administrative tasks as needed.

Cambridge Clothing Company

Sales Assistant

May 2016 - September 2016 (5 months)

Christchurch

Provided personalized assistance to customers, helping them find the perfect fit and style to suit their needs.

Provided customer service while selling suits in a retail environment.

As a cashier have been responsible for handling transactions efficiently and accurately, processing payments, and providing friendly and prompt service at checkout.

Maintained a tidy and organized sales floor, contributing to a positive shopping experience for customers.
